

## **Twin Towers Tragedy or Treason?**

**By Pastor Michael Treis**

[mftreis3@yahoo.com](mailto:mftreis3@yahoo.com)

In delving into this subject I must first agree with the character from the movie *Network* “ I’m mad as hell and I’m not going to take it anymore!” Maybe it doesn’t sound like fitting language for a pastor, but my goal is to seek and tell the truth.

Going on four years have passed since the worst “terrorist” attack in American history, and the truth about who the real “terrorist” are remains cloaked in secrecy and buried deep.

2000 plus people were murdered and no one has been brought to justice. We are still being told a group of terrorist “armed with box cutters” committed this absolutely horrific crime. Nothing could be further from the truth.

The first clue to me that something was wrong happened around 4:30 CDT in Ft. Worth, Texas. I watched and recorded the events then Building 7 suddenly came crashing down as if it had been a controlled demolition. We were told that it had been hit by only minor debris, but there had been a fire burning in it for many hours, and it just collapsed. We were told over and over again it just collapsed from heat and damage. We were told this for over two years. I knew on 9-11 we were being lied to. Buildings do NOT collapse like that.

I backed up the VHS tape and watched it over again. I could see “explosive debris” coming from the building in critical places. I know, I have had explosive training and studied controlled demolition. I also watched the collapse of the twin towers and found undeniable proof of explosive debris coming from the buildings. This proved to me beyond a shadow of a doubt that the planes did NOT bring down those buildings, EXPLOSIVES did!

I have written other articles published on [www.indymedia.org](http://www.indymedia.org) and other places, proving this to be true. I have been criticized and laughed at by non-believers that such a thing could happen. In last month's issue I told you Van Romero vice president of New Mexico Institute of Mining & Technology shared my opinion. He also is well trained in explosives. They send first responders from around the US to teach them how to deal with such things. They teach federal and state agents about explosives also. He should know. But it doesn't take a genius to be able to figure this out, if they are shown what to look for, explosive debris.

In this picture you see puffs of debris coming out in straight lines then expanding. It is important to note this “explosive debris” is not rolling like smoke out of a window but travels a straight line but slightly conical in pattern. Smoke on the other hand, even when accelerated by the overpressure of the collapse of the building, billows and rolls, explosive debris does not.

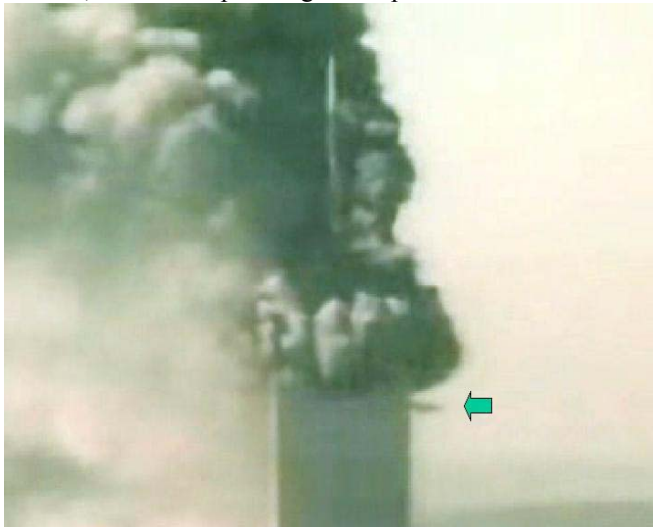

In the picture below you will see the classic explosive debris pointed to by arrows, it comes straight out in contrast to the rest of the smoke that billows and rolls.

Larry Silverstein admitted to PBS that he gave the order to “pull” building 7. In his interview he said “the fire department officials came to him and said they didn’t think they were going to be able to contain the fire and keep it from spreading. Then Silverstein said: “I remember getting a call from the fire department commander, telling me they weren’t sure they were going to be able to contain the fire. I said we’ve had such a terrible loss of life maybe the smartest thing to do is just pull it. They made the decision to pull, then we watched the building collapse.” Here is the proof that they have lied to us from the very beginning, just as I said.

The most important thing to understand is the explosives had to be in these buildings BEFORE 9-11. It takes weeks to set up a large building with explosives, sequence the explosives with the critical timing that will assure that it comes down correctly. Now they are going to tell me that they took explosives with blasting caps into a burning building, drill holes into the concrete and sheetrock and place the explosives, with flames all around them. Then string the wire, or set up the wireless detonators, sequence the explosives, and do in all IN LESS THAN SEVEN HOURS?????? I don’t think so!

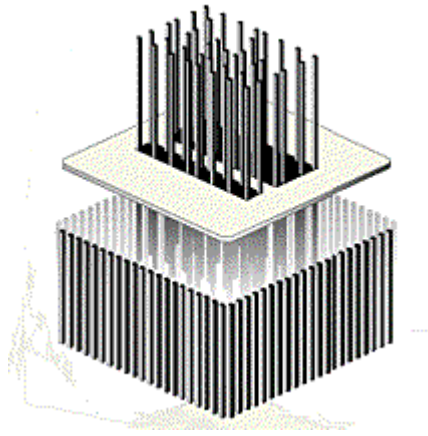

The explosives had to be in building seven, before 9-11. Now building seven is much shorter than the twin towers, it took less planning and explosives than tower one and two.

Here is yet another shot of explosive debris coming from the tower as it collapses. What difference does it make? One man asked me. I was furious! What difference does it make, well let's add it all up. Explosives brought down the building NOT the planes. Explosives had to be in the buildings BEFORE 9-11. That indicates planning. Planning for the event indicates prior knowledge it was going to happen. Prior knowledge indicates TREASON not just a tragedy that just happened.

The greatest problem with the "official" hypothesis in the World Trade Towers collapse is their inability to explain the enormous dust clouds generated by the collapses. When the tops of the buildings had barely started to move, we saw the characteristic jets of fine dust mixed with larger chunks of debris being shot out from the building for some distance. In the first few seconds of a gravitational fall nothing moves very fast. From the beginning fine dust like concrete can be seen blowing out to the sides, growing to an enormous dust cloud as the collapse progresses. The fine gray dust was literally crystalline concrete. It takes great pressure to break down concrete to its crystalline structure, overpressure that could only be caused by high explosives.

The floors themselves are 39" thick, the top 4" is a poured concrete slab, with interlocking vertical steel trusses.

This would absorb a lot of kinetic energy as one floor fell onto another crumpling, and pulverizing a small amount of concrete striking the floor below. There is instead a very fine dust being blown out to the sides as if 400,000 cubic yards of the entire mass of concrete was converted to a crystallized dust. Remember too that the tower fell at almost the speed of a gravitational free-fall, meaning that little energy was expended doing anything other than accelerating the floor slabs.

The rough amount of concrete in a single floor was ~1 acre x 4" the bond between the chemical had to be overcome in order to reduce it to a crystalline powder, this requires the energy of high explosives. If such energy had been expended in pulverization of that concrete the energy absorbed would slow the speed of the fall greatly.

The buildings fell in a 9-12 seconds. The time  $t$  required for an object to fall from a height  $h$  (in a vacuum) is given by the formula  $t = \sqrt{2h/g}$ , where  $g$  is the acceleration due to gravity. Thus an object falling from the top of one of the towers (taking  $h = 1306$  feet and  $g = 32.174 \text{ ft/sec}^2$ ) would take 9.01 seconds to hit the ground if we ignore the resistance of the air and a few seconds longer if we take air resistance into account. This means that very little of the gravitational energy can have gone toward pulverizing the concrete. There is only one explanation explosives were used in all three buildings.

The next big question is why? What was the motive? How about war? How about a war in Afghanistan that had been planned for months. On Tuesday Sept. 18, 2001 the BBC reported: "Niaz Naik, a former Pakistani Foreign Secretary, was told by senior American officials in mid-July that military action against Afghanistan would go ahead by the middle of October." For over two years prior to 9-11 negotiations were

taking place with the Taliban. Dick Cheney sat on the Afghanistan Oil Reserve Control Board they offered “a carpet of gold” if the Taliban allowed the pipeline from S.E Asia to Moscow to go through Afghanistan. They were promised “a carpet of bombs” if they didn’t in the notes of the meeting. The last negotiations took place two months before 9-11 in Washington, DC and the Taliban still refused to allow the pipeline through.

9-11 not only gave the reason to invade Afghanistan but allowed bombers to clear the way for the pipeline. Halliburton (Dick Cheney’s old employer) got the contract, and built the pipeline. Where were NBC, ABC, and CBS in reporting this to us?

9-11 also allowed the overthrow of Saddam Hussein. I’m not saying Saddam was a good guy because he wasn’t. Just like Osama Bin Laden, Saddam was a CIA asset and had been since he was a contract agent of the former president of Iraq in 1949, in which he failed. He stayed in CIA good graces and made his way to leadership in Iraq.

Osama was a CIA asset during the conflict after Afghanistan broke away from the Soviet Union. Both Osama and the Taliban were CIA creations used for the battle against Russia.

9-11 has also been used to pass unconstitutional bills like the USA Patriot Act. Which like the Anti-terrorism Bill could not have been passed unless a terrorist event had first preceded it. This is the formula of the Hegelian Dialectic: Thesis, synthesis, antithesis PROBLEM, REACTION SOLUTION.

1 You CREATE a problem

2 You FRIGHTEN people with the problem

3 Then you offer them YOUR SOLUTION; they would NEVER have been willing to accept until you CREATED the PROBLEM! This has been used on the US citizens repeatedly; Pearl Harbor, even the History Channel admits they knew the attack was coming.

World Trade center bombing #1, Emad Salem a paid FBI informant testified in the trial transcripts published in the New York Times (Thursday October 28, 1993 Page A1) he suggested using inert powders but the FBI said NO. The FBI provided the explosives as well as the expertise to build the bomb used. Carey James Gagen giving sworn testimony before a second grand jury convened by the people of Oklahoma because the persecutors, I mean prosecutors, refused to.

In his sworn deposition and testimony Mr. Gagen brought forth paperwork from the Justice Department giving him 15 months immunity from prosecution. He was in the middle of the Arab group that placed explosives inside the building. Al Hussani Hussein was evolved (also in WTC bombing 1 and 2). Gagen warned his handlers two weeks before the bombing of what was about to happen. None of them did anything! They refused to bring him in to reveal the plot. They refused to listen. BOOM! Now you see how they got the Anti-terrorism Bill passed. They doubled the budget for terrorism after WTC bombing #1, and tripled it after Oklahoma City Bombing. Didn’t stop 9-11 did it? Unscrupulous individuals within our government planned these events, and there is NO accountability.

I am not against government, without government there would be anarchy. I am however against these individuals who commit acts of treason with no accountability because of their great power. Power, that must be broken if they are ever going to be brought to trial. Power, We The People must exert to force these individuals to be brought to trial. The “Doctrine of Laches is based upon the maxim that equity aids the vigilant and not those who slumber on their Rights.” (Blacks Law 6<sup>th</sup> edition) Simply put if you don’t exercise your rights you LOOSE THEM. We have slumbered too long. How long will we allow the death of these people to go unpunished?
